But looking back at our treatment of Fibonacci algorithms, we have been too liberal with what we consider a basic step.

S.Dasgupta,C.H.Papadimitriou,andU.V.Vazirani 141 Trees A tree is an undirected graph that is connected and acyclic. Much of what makes trees so useful is the simplicity of their structure. For instance, Property 2 A tree on n nodes has $n - 1$ edges. This can be seen by building the tree one edge at a time, starting from an empty graph.
