Curriculum Based Measurement A Manual

A: Curriculum-based measurement, or CBM, is a method of monitoring student educational progress through direct assessment of academic skills. CBM can be used to measure basic skills in reading, mathematics, spelling, and written expression. It can also be used to monitor readiness skills. When using CBM, the instructor gives the student brief, timed samples, or "probes," made up of academic material taken from the child's school curriculum.

Teacher Deluxe includes our template-based interventions log, additional reports, and student retention feature.

easyCBM

Curriculum-based measurement (CBM) is a set of methods used to index academic competence and progress (Fuchs & Fuchs, 2002). CBM is designed to be an efficient, reliable, and valid assessment of academic performance. Each assessment samples a relatively broad range of skills by sampling from each dimension of the annual curriculum. This sampling allows progress to be measured on equivalent forms across the academic year.
